

Buy American with

Rebuilding the infrastructure takes time.
You shouldn't have to spend more time worrying if your filler metal can meet the requirement for these jobs.

Every Hobart Brothers mild steel and low alloy steel tubular wire sold in America – flux-cored and metal-cored (with the exception of our Megafil wires) – meets the Buy American requirement for projects funded by the American Recovery and Reinvestment Act of 2009 (ARRA). These tubular wires also meet the American Iron and Steel (AIS) requirement in section 436 of P.L. 113-76, Consolidated Appropriations Act, 2014. That means that our filler metals are composed of steel melted in United States steel mills. Plus, each of our tubular wires meets exacting standards for quality and performance. You can be certain that they'll provide the right chemical and mechanical properties for your infrastructure application – every time.

For more information on our tubular wires, contact your local Hobart Brothers representative. Or call 800-424-1543 to speak with a customer service representative.
